7. Backfilling/Grading (trenches, pits, roads, highwalls, shafts)	☐	☐	☐
8. Soils	☒	☒	☐
9. Revegetation	☐	☐	☐

Bond Renewal Date: 06-09-2009 **Bond Amount:** $18,600 **Permit fee** is up to date

Purpose of Inspection: Routine annual inspection. This site was inspected as a small mine site on 12/04/2008 by Brett Gregory

Inspection Summary: Toured the mine and surrounding area. Operator has placed rip rap to help with erosion of the fined grained material. Every effort should be made to salvage top soil from the site prior to mining.

Photos were taken to document site conditions.

Conclusions and Recommendations: Operator is past due for escalation. It is the recommendation of the Division to reclaim back to 2 or 3 acres, as opposed to increasing the reclamation bond. Operator should plant an interim cover crop to help reduce weeds. Operator should limit access, as the site is adjacent to the local landfill and people are using the site to clean out their pickups. OGM to continue annual inspections and monitor the site when in the area.
