Salt Flats Study 10/11/89

USGS study - preliminary
$105,000 for each of 3 years - 3-yr study
Study
cycle of salt crust
& shallow brine (30ft depth) relationship
- impact of canal drainage
- density & define aquifer characteristics
- mitigation of salt loss -
- climate impact

redeposit salt
reduce drainage
canals

ACEC designation
use data from Reilly
no $ from Reilly

State Lands - resource evaluation - justify some state $

UGMS
DNR approach
2480 ac. → leased to Parks for Saving
USGS would match additional $

leases renewed for 20 yrs in in 1983

State - USGS spearhead study
contract USGS to do this for BLM
additional $ — will be matched by USGS
State - USGS - BLM study

Need
- get BLM copy of EPA
- indirect cost rate - don't want it
- Parks $
