3-22

Jim

Found this file the other day. Have set up a meeting with the company and State Health for Monday 10:30. The Division has already discussed our concerns and given MR-1 to R.K. Kronstadt from Portland Cement so we will not need to attend the meeting. The company will resubmit the new MR-1 in a couple weeks.

However they may call anytime for "advice" on how to reply. You should direct some people to respond when he calls.

Our visit, Pam, Lynn + I, last Monday determined that 5-7 acres and 120,000 tons makes this an existing, unpermitted mining operation. Yet it should be a simple one to process. Questions?

Tom
