7-1-1990

Comments on Poverty Point Quarry

(1) What measures are planned to minimize interference with the natural drainage present?

(2) Which plan will be utilized? The EIS or NOI, or a combination?

(3) What is source of limited G-W info. in area? where was data extrapolated from.

(4) Plans for stockpiling growth medium? Protection from erosion?

(5) pg 3-3, Has BLM written environmental impact report (EIR) on access road development yet??

* (6) Map showing 1-50' load out area approx. facility locations

(7) Has BLM granted right-away yet? Copy of lease agreement

(8) Stockpile or placement of wastrock?

* 11(e) Describe procedure or method for placement or containment of all disturbed materials.

(9) Slight conflict between plans on final regraded slope (EIS - 45° or less), (NOI - 25° to 30)

(10) Reveg. plan (EIS) pg 4-1 & 4-2 "areas capable of revegetation will be planted as required by reclamation standards." "Effort will result in project land with grazing and forage productivity equal to or greater

Devils Slide Area (Mine plan + permit for Kathryn Claims)?

① Kathryn Claim (do we have map of these claims?)

② Where will new plant go?

③ Boundary on map

④ Request M(10)-8 for variance on drainages pg 2 of 3
MR Form 8 (questionable)
- Stability analysis, erosion potential, what is the composition

M-10 (9) variance on Structure + Equipment
questionable (?) Ask our Attorney.

⑤ Submit map of road to be built
(letter submitted in request)

⑥ X-section A-A' Quarry 2 Ridge (not readily seen on map (1969))

⑦ Air Quality Permits obtained?

⑧ Identify # of mine plan applications (3)?
- can be combined in one plan (if adjoining)

① Address reps separately for each quarry?

⑩ Is this fee land?
