DIVISION OF
OIL GAS & MINING

March 31, 1992

Mr. Don A. Ostler, P.E.
Director
Division of Water Quality
Utah Department of Environmental Quality
288 North 1460 West
Salt Lake City, UT 84114-4870

Dear Mr. Ostler,

Subject: Diesel Fuel Incident - Request for Extension

In response to the Division's correspondence dated February 24, 1992, Barrick is requesting an extension of submittal of the Remedial Investigation (RI) Report and the Corrective Action Plan (CAP) from April 1, 1992 until April 15, 1992. This extension will allow completion of analysis of the drilling data from 29 drill holes completed in the tank farm area (data received by Barrick March 30, 1992), and to complete the construction drawings for the proposed concrete sump liner addressing the CAP.

Please contact me should you have any questions concerning the request for extension, or any related matter. Your continued cooperation is greatly appreciated.

Respectfully,

David Beatty
