RE: Amendment 96D Review, White Oak Mining & Construction Company, White Oak Mine, ACT/007/001, Folder #2, Carbon County, Utah

SYNOPSIS

White Oak submitted a permit amendment on October 11, 1996, to add Section 9: Spoil Disposal Area into the permit. The abatement requirements for NOV N96-7-3-1 required White Oak to submit a certified engineers report for the Spoil Management Area.

ANALYSIS

The amendment included a completely new section 9 for inclusion into the permit. It references pages O-15 and O-16 of the MRP. This submittal was reviewed by Wayne Western and Randy Harden, engineers for the Division. Both indicated that the submittal was adequate for inclusion into the permit and included adequate stability analyses.

RECOMMENDATION

The spoil disposal area can be approved. I recommend that the submittal be approved and incorporated into the White Oak Mining and Reclamation Plan. The NOV N96-7-3-1 was terminated on October 23, 1996.
