Harson Limestone Quarry 12/11/87

Revegetation recommendation: (by F. Jensen)

1 - Reshape the area -
2 - Try to get back at least one foot of topsoil on area to be seeded -
3 - Rip at least 6" deep to prepare seedbed - leave soil surface rough - with small pits to trap precipitation -
4 - Broadcast seed:

Species	lbs/acre
Crested wheatgrass	6
Intermediate wheatgrass	2
Indian ricegrass	2
Alfalfa (dryland)	2
Fourwing saltbush	2
Rabbitbrush	2
Bitterbrush	2
Big sagebrush	2
	20 lbs/acre

5 - Lightly harrow or rake in seed 1/4" - 1/2"

6 - Broadcast fertilizer - 200 lbs acre
Diammonium phosphate - 18-46-0
