SUBJECT Discussion with Dan Powell, Operator

DATE 7/20/92

I spoke with Mr. Powell today concerning pre-existing disturbance at the Cherry Hill Park limestone quarry. There are 3 pre-existing pits, pad, access road, a loadout facility, utility building, and several 50 gal drums of grease. Mr. Powell indicated that he will not be using the loadout, utility building or grease drums. I advised him to photo document all pre-existing disturbance, so he would not be held responsible for those features or portions of the site he was not going to use
