ACT/053/002

File -
5 M - Corporation - this is the Metal Mine not coal.

4/13/78 - Meeting

25,000 Blanket Bond.

Ted Sorenson Uranium milling - agitation 500 T.P.D. + Heap Leach.
Clement Chase 10,000,000 T. tails - Upper Chinlee Tennessee/Leeds
G. Glazier.
Walt Plum Initial Program - Copper/Silver -

Need good topographic coverage - 1" = 500' of mill site & ponds.
Topsoil stockpile - show on topo map.

Sequence of mining on map.
Exemption as exploration.
Alternatives
Present case to Board - no exemption. Estimate
Violate law and pay penalties. Bond.

No uranium milling in app N.O.I.

Toni, This was filed in 5-M's Coal Mine File. Try Again!
Mike

Grading & Regrading

should be = angle of repose for loose material

Get trial plots going in:

Trail Hill ss/clay

Tecumseh/Reeds ss., sh. & clay.

If mining is to be selective to channel at first how will this be staged?. Size of pits, will the scarifying & terracing be possible. If operation is and prior to massive stripping how will the small pits be reclaimed?

The land to be used for leach piles & tailings piles should be stripped of soil & stockpiled - also consideration should be made for adequate cover of uraniferous tailings & leach piles (if needed)
