Request for Renewal of Contract for the Sale of Mineral Materials

Dear Mr. Hurst:

Review of your current contract has uncovered a number of issues and inconsistencies that need to be resolved before your request for a contract renewal for the Sale of Mineral Materials can be processed.

Item 1: Your original contract was apparently issued without the submission of Mining and Reclamation plans. Under 43 CFR 3601.40 you will need to prepare and submit Mining and Reclamation plans for your proposed operation. Both the Mining and Reclamation plan may be submitted concurrently and in one document.

Item 2: We have noted discrepancies in the legal description(s) documented in your file, and between the legal descriptions and the actual area being mined. Your original contract stated your project location as: T35S, R10E, Sec. 18, SWNWNE. However other documentation on file with Bureau of Land Management (BLM) has your project location as: T28S, R9E, Sec. 23, N2NWNWNE. In addition, GPS positioning of your mining operation indicate the actual mining area is located in Sec. 14 of T28S, R9E.

Item 3: Please be advised that the current determined fair market value for humate is $6.00/ton (*Review of Humate Sales Rates for the U.S. Bureau of Land Management, McKinley and Sandoval Counties, New Mexico, August 2011*).

Item 4: A number of open pits excavated during mining operations were observed by BLM personnel during a site visit conducted on 10/24/13. Due to the fact that your mining area is located in an area designated as a Special Recreation Management Area (SRMA) that experiences a high volume of OHV

use you are requested to backfill all open pits and smooth the operational area to approximate natural contour when not conducting mining operations in the interest of public safety.

Before a new contract for the extraction of humate can be issued we need to discuss and resolve these and other issues related to your mining operation. We are therefore returning the check you submitted with your contract renewal request pending resolution of these and other issues. With the ultimate goal of issuing a contract renewal for your mining operation, we recommend an on-site meeting between yourself or your representative, BLM and Utah Division of Oil, Gas and Mining (UDOGM) personnel. Please contact our Geologist, John Reay at 435-542-3461 to arrange an on-site meeting at your earliest convenience.

Sincerely,

Sue Fivecoat
