

September 25, 1998

TO: Utah DEQ - DWQ, and DOGM

FROM: White Oak Mining and Construction - Vicky Bailey, EarthFax Engineering

Due to a high reading for pH in a sample taken by DEQ-DWQ from Pond 004A at the White Oak Mine during July, a pH sample was taken in August. No water was discharging from the pond during the August sampling for pH. Therefore, on the August Discharge Monitoring Report only pH and oil and grease visual have been recorded.
