Subject: Installation of a culvert at the White Oak Loadout
ACT / 007 / 001

ENCLOSURE *AMCOB*

Dear Mrs. Grubaugh-Littig,

Under the direction of David Miller of Lodestar Energy, Inc., please find attached (2) copies of the calculations for a new culvert to be installed at the White Oak Loadout. A third copy of this submittal is being mailed to the Price Field Office.

The purpose of this submittal is to address the concerns of the inspector for the White Oak Mine and Loadout, Mr. Peter Hess. Mr. Hess observed some erosion on a cut slope near the substation and asked that a solution be proposed. This submittal proposes to install a 6-inch culvert to take the runoff over this cutslope in a controlled manner. The attached calculations present the design of the proposed culvert.

Should you have any additional concerns or questions, please contact me at 561-1555 or David Miller at (435) 637-9209.

Sincerely,

Layne D. Jensen
