Re: Lodestar Energy, Inc. - Proposed Blasting - Permit C/007/001

Dear Mr. Miller:

This letter is to confirm the phone conversation of November 13, 2001 between you, Al Richards, and me. Questar Pipeline Company requested and received a meeting to discuss a pre-blast survey regarding the above referenced permit. Al Richards has E-mailed you the information requested to complete the pre-blast survey analysis. Questar is waiting the written pre-blast survey report. As a result of our meeting, Questar Pipeline Company is proceeding with a geo-technical analysis of the planned Lodestar blasting. The purpose of this analysis is to determine if the blasting will have any adverse effects on the existing Questar Pipeline Company natural gas pipelines.

Questar operates several high pressure pipelines in the area which are critical to the heating and energy needs of the Wasatch Front. To ensure continued safe operation of these pipelines Questar requires that no blasting occur until the geo-technical analysis of the Lodestar blasting plan has been completed. Please contact me, or Al Richards (307) 352-7654 if you have any questions.

Sincerely

*David A. Ingleby*
