Subject: White Oak 5/30/03 Update

- a) Pictures are in the o:/ drive under White Oak images
- b) Todd K. is cleaning out the sediment pond. He thinks he will be about to get 1,000 cubic yards of sediment. The total material is estimated to be 3,000 cubic yards. This material is mainly composed of coal fines. The thickness of the sediment is 8 ft. in most places. See pictures
- c) UP&L will disconnect the power on Monday.
- d) Todd K. will be working all weekend reclaiming cut-slopes. Plans to be finished first of the week. This area will take the place of the sediment pond removal.
- e) Diversion are deep and wide to handle initial sediment from storms.
- f) I have requested Todd K. to give the Division the seed tags stating "Weed Free Seed".
- g) Seeding will commence on Monday by Skyline Reclamation.
