Subject: White Oak Water Monitoring

Pam,

On May 1, 2003 Mary Ann and I went to look at the White Oak Loadout and assess the Kiskaden's plans to reclaim part of it. Mark Wayment showed us around. At that time he indicated that although he was still the registered agent for the White Oak Mine, he was not performing any duties since Lodestar had stopped paying him. He told us that he had not done any water monitoring in April because it would have meant cost out of his pocket to get lab analyses and he did not plan to do any for May or future months either.

Let me know if you have any questions about this.

Thanks,
Dana
