

DAILY CONSTRUCTION PROGRESS REPORT
-- INSPECTOR --

Project: White Oak Reclamation Date: 10/23/2003 M T W **Th** F S Su

Crew: 6 LEDCOR and 2 Mark Wayment (steel salvage crew) Supervisor: Wayne Helsel - LEDCOR
Hours: before 07:40 to after 16:45

Equipment: 2 Caterpillar bulldozers, 2 Cat articulated trucks, 2 Cat tracked excavators, water truck, Daewoo tracked excavator. Wheeler Machinery service truck and crew on site all day. Third articulated truck down all day for maintenance/repair; D10 dozer down from ~ 09:30 to 11:00 for maintenance/repair.

General description of work performed, equipment/material deliveries, etc:

Four loads of coal removed during the day; the first truck was driving off-site at 07:30 as I drove up the entry road. Cat 345B excavator and the two trucks were moving waste to pit "D" at 07:40 when I arrived on-site; there was a lot of dust but the water truck was at the pond being filled and it started spraying ~ 08:00. One D10 bulldozer started pushing waste into pit "C" at around 08:15. Welders started cutting scrap ~ 08:30. Wayne on-site ~ 09:30. D10 from pit "C" down for maintenance ~ 09:30, but the second dozer started spreading the fill in pit "D". Dozer finished maintenance and moved to pit "B" at ~ 11:00 and continued to push waste into this pit for the rest of the day. Second dozer returned to pit "C" at ~ 13:00 and continued to push waste into pit "C" until ~ 16:00. The 345B excavator and 2 trucks continued moving waste to pit "B" for the rest of the day. The smaller excavator began to construct what looks like an access road in the waste on the north side of pad "B".

YARDS MOVED: Undetermined CY
TOTAL MOVED TO DATE Undetermined CY
TOPSOIL MOVED: None CY
AREA SEEDED: None
RIPRAP Undetermined

POTENTIAL ISSUES: None

Visitors & purpose Dana Dean, Wayne Western, and Jerriann Ernsten of DOGM stopped ~14:00 for a brief site visit on their way back from the Emery Deep Mine.
