Subject: White Oak - Kiscaden (Transformers and Trailer/Proof of Insurance)

I just spoke with Scott Kiscaden about the transformers and trailer that are by the school (across the street from the loadout). He said that he will be moving all of the transformers and the trailer sometime this summer to a new mine that he bought in the East. He said that the transformers were tested before he bought the mine (before 1992) and are all okay. I asked if he had those papers and he said no.

He also said that he would like to make sure that the contractor who works at the mine has insurance (he would like proof of insurance) because they go over his property. He is concerned about the 40 acre parcel that he owns between the two Oman parcels. He said that there currently two steel posts designating the area. He was going to put up a gate, but decided he wouldn't until the reclamation is finished.
