Subject: White Oak Mine sublease

Per your request to check on the status of any continuing reclamation liability for lease Federal Coal lease #70018, I asked two of our mining engineers who worked on the White Oak mine reclamation, Dana Dean and Wayne Western, to look at this issue. Based on the mine map for the site, neither the surface area of the open mine pit nor the mine loadout overlapped with lease 70018. All of the pit-mined coal showed as fee coal held by Carbon County.
