Place: OGMCOAL

Milton A. Oman Trust, LTD
 c/o Darin Caine

Hello Darin,

The Division of Oil Gas and Mining has recently contracted with an engineering firm to generate a contour map of the Whiskey Creek reclaimed site using aerial photography. We expect to be able to work with the contour information to develop volume calculations for the site stabilization and channel restoration work. James Owen is our staff engineer who will be designing the work before it goes out to bid. Before he creates designs, he would like to know if you are still interested in having a jeep trail and approximately where it should pass on the property. James works out of the Salt Lake office. His telephone number is 801-538-5306 or you can reach him by email jamesowen@utah.gov

We hope to put this job out to bid and get it completed during the 2010 field season.

Thanks,
 Priscilla.

 Hello Darin,

I am sending you a drawing that shows the approximate locations of the terraces to be constructed at the reclaimed mine site. Per our telephone conversation today, would you indicate on this drawing where you would like to have a jeep trail and where you would like the trail to end? Please scan the drawing with your notations on it and return to me so that we can include your request in the work specifications.

Thanks,
Priscilla.
