Subject: Fwd: Packet for Bid AR11035 - White Oak Mine Site
Attachments: Packet_for_Bid_AR11035[1].PDF

Hello Jo,

I am trying to send this email and attachment to OGMCOAL. I got an error message previously. So, I have saved both the email and attachment to the O:/007001.w0/FINAL directory. If this email attachment does not come through on this email, please look for it in the O:/007001.w0/FINAL as a pdf file named E_ARuger 8162010 Packet_for_bid_AR11035[1].pdf.

Thanks,
Priscilla.

Please find attached the bid packet for subject solicitation. Please review this information and let me know if you have any questions or comments.

Note that the language in the general specification regarding bids has been modified. Please make note of these changes and incorporate them into future SOW's sent here. The language I changed or deleted was either redundant with what's in BidSync, or it conflicted with Bid Sync. (For example, one change I made is deleting the notary section....we do not require a notarized signature on bid documents.)

THX
