Priscilla,

Attached is a drainage plan for use during construction activities. The straw bale retention/filter structures would be dynamic in the fact they could be placed as needed to minimize silt transmission during storm events, based on construction progress and completion.

Please review, if you have questions, please let me know.

Thanks

Kent.

Kent,

Yes, we'll see you tomorrow at 9 am at the site.

We would like to discuss the construction schedule with regard to timing of seeding and biosolids application.

We have a notice to proceed ready, but are waiting to receive the drainage control plans.

Thanks,
Priscilla.

Thank you,

I will see you in the morning at 9.

Thanks

Kent.

Morning Kent,

The landowner on both sides of the access road and of the south facing slope at the site is Darin Caine 801-541-0973.

Scott Bradford, Miller Creek Lumber, near Price, 435-637-3878, is another source of log bundles 10 ft long (such as those used as mine supports) and waste boards (could be used for mulch).

Priscilla.

Priscilla,

When I prepared the proposal for this job, I spoke with a gentleman in the area regarding logs, I believe his name was Darrin. I have misplaced his number and wondered if you happen to have it.

Thanks

Kent.

Hello Kent,

State offices are closed on fridays, but I will look over your documents ASAP on Monday Oct. 4 and then issue a Notice to Proceed. Peter Brinton (engineer) and I are both available for an onsite, pre-construction meeting. Lets meet at the site at 9 am, October 5.

Priscilla.

>>> "Kent Fawcett" <kent@innovative-companies.com> Thursday, September 30, 2010 11:20 AM >>>

Priscilla,

Thank you for the email. I plan to complete the document package by Friday and send it to you Friday afternoon.

I would like to take advantage of the good weather we are having and if we can get everything in place, be on site by the 6th of October. As you know, we do not have a lot of staging area, bringing the biosolids to the site the week of the 11th may be aggressive scheduling, but we will do what we can to accommodate PRWID.

What is the possibility of a pre construction meeting Tuesday, the 5th.

I look forward to working with DOGM and yourself on this project.

Thank you,

Kent.

Hello Kent,

The next step is for you to provide me with the certificate of liability, the construction schedule, safety plan etc. I sent Kara an email last week with all the information that OGM needs before we can issue the Notice to Proceed. Let me know if I can be of help.

I visited the water treatment facilities in Spanish Fork and Wellington today. PRWID would like to have their biosolids removed during the week of October 11 - 16. Hopefully we can accomodate them.

Thanks,

Priscilla Burton, CPSSc
