Good news! DWQ has a source of funds available to us for the purpose of hauling biosolids. See below.

Hi, I didn't want to say anything, until I talked to the Watershed Protection Section manager (AKA TMDL) but there is some grant money still available under the NPS program. What I need from you Priscilla, is to click on the link above, and scroll to the bottom of the page, and under "onsite wastewater treatment systems" ( I know, it doesn't make any sense, but hey, we're bureaucrats) and fill out the application for biosolids hauling money, I mentioned \$40,000. We also need pictures, the Reclamation Plan, and sample results from last Thursday to begin the process.

Bob, if you could submit a short letter on EPA letterhead, stating the "Beauty of Biosolids" and the success of mine reclamation, he said it would certainly help (he said I should submit one as well).

Of course, like all grant money, we have to show our priority over the others who seek the moneys as well. He said we have a good shot at it, since Scofield Reservoir is impaired for phosphorus and DO, and the Fe may be violating our water quality standards as well. Amy Dickey is the Watershed Coordinator for that drainage area. Amy, do you have anything to add? Thanks, and if you any questions call me Monday.
