Subject: White Oak Seeding Accomplished.

Ingrid,

I just received a phone call from John Lee, Skyline Reclamation. He said that the remainder of the seeding was accomplished at White Oak today.

He and Dave used snowmobiles to haul the seed to the terraces and then walked the slopes to broadcast the seed over the 8 acres that were ready for the final mix. From Terrace A up, the site is seeded with the final mix. From Terrace A down-slope and down-stream was seeded with Triticale only.

He has reserved three bags of the final seed mix for the final seeding at the site next year. He will store those in a dry location at his warehouse. When he left the site today at 2 p.m., snow was coming down fast (white out conditions).

Priscilla.
