Hello Kent,
With regard to the site safety plan, please be aware of a "soft spot" in the Whiskey Creek stream channel in the vicinity of the former sediment pond. You'll want to take precautions when working in this area. Photos of this sed pond, taken during operations, are attached.
Priscilla.

Priscilla,

Attached are the documents as required. Please review and let me know if you have any questions.

I am unclear what your intentions are regarding a drainage control plan, if you would please explain what it is you are looking for, I can get that to you. Also, I was in contact with a man named Darrin who is willing to provide the logs to us, I believe you may know of him.

Thank you,

Kent.
