Hello Darin,

I will be at the site again on Monday and Tuesday, if you would like to meet me there. What is your impression of the work so far?

The crew worked all day today on the stream channel and hauling biosolids. Attached are photos of the work that was accomplished today.

The crew is taking this weekend off. They have worked the last 12 days straight. We've been lucky that the weather has cooperated and they've been able to get a lot accomplished. (See attached photos.)

Next week we will need logs to stabilize the banks during channel construction. Have you worked something out with the contractor?

Thanks,  
Priscilla.

Priscilla Burton, CPSSc

Ms.Burton, I have been down to see the reclamation but I missed the workers because it was a Sunday and the other day the weather was bad no one was there except my logger. I am sorry the weather turned please let me know the status of reclamation with the weather issues. I'd also like to meet with you some time in the coming week on site when I know you and the workers will be there.

Thanks, sorry about the rain,  
Darin
