Hello Darin,

Well, the weather may have stopped us this week. There are four inches of snow on the ground and more coming. The graded surface is very soft. If the weather clears up and the terraces dry out, we could start again.

I ran into Joe Fiedler, your logger, at the site. He is keeping a close watch on the place for you. Kent, per message below, please contact Mr. Fiedler. His telephone number is 435-262-2364.

Priscilla.

I must have missed the workers last Sunday or I did not see they were working below. I will be down again midweek.

I am glad the rain has not troubled the work. My logger has all the logs the contractor will need. I just want my logger to get compensated for logs used that are better logs and I would like to donate all the firewood the contractor wants to use on the site. Please have him speak with my logger so he can show him what he needs.

thanks, Darin
