Subject: Re: 0070001 Outgoing White Oak mine site reclamation

Hello Darin,

Yesterday we met with the contractor in the morning. He will wait for Whiskey Creek to dry up before resuming work. I expect that will be another couple of weeks...it is still carrying a lot of flow. In the mean time, we will begin planting riparian seedlings along the upper reaches and the lowest reaches that are finished.

I will meet you at the site any time it is convenient for you. Please name the date and time. (I am away from the office the week of July 11.)

Priscilla.

Ms. Burton, I am sorry I missed you I thought you would be working there for more time. I must have passed you outside of scofield I arrived just after 1. I drove to the top of the mountain where I thought I had service to call and email but my emails did not go through. Let me know next time you will be on site I'd much rather meet you in person when you are working up there one afternoon.

Thanks, Darin
