Hello Daren,

Yesterday, we held a pre-bid site meeting for the work to be done in Whiskey Creek. We noticed that the bridge across Eccles Creek at Whiskey Canyon has several broken cross pieces and a hole in the roadway. Contractors were concerned that it may not be strong enough to handle heavy equipment. I did encourage using the smallest equipment possible, but I do not want to risk an accident.

Therefore, I would like to modify the Whiskey Creek stream alteration permit #15-91-6SA to allow crossing of Eccles Creek with construction equipment. DOGM would ensure that any damage caused by the crossing would be repaired by the contractor before he left the site.

I've attached a picture of the bridge when it was newly constructed in 2009 and two photos taken in 2015 showing Eccles creek downstream and upstream of the bridge. Please let me know if you'd like further information.

Thank you,
