Hello Mr. Johnson,

These photos show the railroad car and coal spilled near the tracks at the reclaimed White Oak Mine Loadout. In addition there are piles of metal debris, rail road ties and gravel stacked along the roadway.

During our phone conversation today, you mentioned that the spill may have happened before the switch to Union Pacific tracks. If so, the spill would not be the responsibility of Union Pacific Rail Road.  
Thank you for looking further into the matter.

Sincerely,

Priscilla Burton, CPM, CPSSc
