Memo to File:

Re: Braztah Corporation
Carbon County, Utah

ACT/007/004

On September 1st 1977, Ron Daniels and myself stopped at the Braztah offices in Helper to check on the mine progress with Ken Hutchinson, Chief Engineer. Ron and myself indicated that at which time the Federal coal mining regulations for the surface effects of underground coal mines were finalized that the mining and reclamation plan for Braztah would have to be reviewed.

Mr. Hutchinson said that the site(s) for the washery refuse was not yet picked, but that the Division would be kept well informed. He also was interested in the State's requirements for contour strip mining.
