Larry F. Bowen  
Horrocks Engineers  
P.O. Box 377  
American Fork, UT 84003

Dear Mr. Bowen:

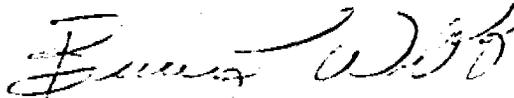

The following are the results of the soil analysis we performed for you:

Phosphorus 5.7 ppm, potassium 171 ppm,  
pH 7.8, E.C.  $\times 10^3$  2.9.

These data indicate this soil is suitable for a seed mixture of grass and alfalfa. The fertility is a little low so we would recommend that you apply 40 lbs/Ac of nitrogen and 30 lbs/Ac of  $P_2O_5$ .

If you have any further questions, feel free to contact us.

Sincerely,

Bruce L. Webb  
Supervisor, Soil Testing Lab
