P.O. Box 2500  
Salt Lake City, Utah 84110

Attention: Steve McNeal

Subject: Price River Coal Company  
Crandall Canyon Support Facilities

Dear Steve:

Enclosed is a copy of the sedimentation pond detail that you requested. It has been designed to meet the Federal Surface Mining Regulations.

The oil separator has been designed to handle wash down water from the shop and warehouse and drainage from around the building. It has a capacity of 30 gpm and will be preceded by a holding tank with a capacity of approximately 1500 gallons.

If you have any questions, please give me a call.

Very truly yours,

HORROCKS & CAROLLO ENGINEERS

Larry F. Bowen, P.E.  
Project Engineer
