RE: Leachfield Construction  
at the Crandall Canyon  
Modification  
ACT/007/004  
Carbon County, Utah

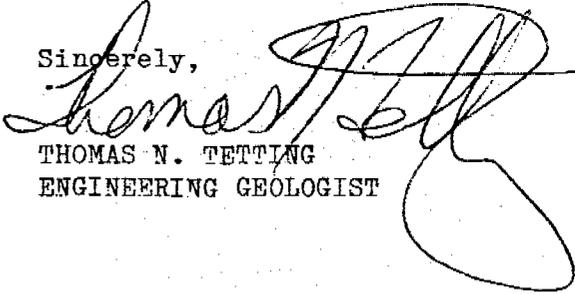

Dear Mr. Wiley:

The Division has received the addition of the leachfield design plans and will include them in the final technical analysis for the Crandall Canyon Modification to the PRCC's Complex Mining Plan. The entire leachfield design has been reviewed and a construction permit has been issued by the Department of State Health; however, we have two questions which we would like answered in order to completely satisfy our concerns before a Technical Analysis (TA) is started:

1. How (broadcast, drilled, etc.) and when will seeding take place?
2. What is the stocking density for trees (and shrubs) planned for revegetation?

A notice for your information has been enclosed pertaining to this second question. Please let me know if I can be of further assistance to your operation.

Sincerely,

  
THOMAS N. TETTING  
ENGINEERING GEOLOGIST
