RE: Request for Deletion  
of Subsidence Monitoring  
Price River Coal Company Complex  
ACT/007/004  
Carbon County, Utah

Dear Mr. Cook:

After due consultation with members of the Division's staff and associated project review team it has become apparent that the request to delete subsidence monitoring on Price River's mine plan area is premature at this time. It is the Division's decision that should this request still be desired upon completion of the review of the entire mining and reclamation plan it should be resubmitted at that time. Perhaps, with good progress on both our parts this can be achieved prior to the upcoming 1983 season for performing additional surveys. However, until that time approaches the request cannot be considered any further.

Sincerely,

THOMAS N. TETTING  
ENGINEERING GEOLOGIST
