RE: Preliminary determination  
of possible future archeo-  
logical study sites  
Price River Coal Company  
ACT/007/005  
4

Dear Jim:

As I spoke with you on the phone June 4, about this subject, I trust you will have some familiarity with it. Enclosed you will find a copy of the letter from Price River Coal Company and the associated map it references. If there is any possibility you may aid their determination of siting conflicts with potential archeological or historical resources by devoting some attention to the subject, please let me know. Price River Coal Company is currently trying to provide a response to certain cultural resource provisions in the Coal Regulatory Program Mine Plan Review under which they are subjected at this time. It appears that they need all the help they can get. I hope that you may find time to allow them to benefit from your expertise.

Please call if further arrangements need to be made or if I can be of any assistance.

Sincerely,

*Thomas N. Tetting*

RE: Cultural resource clearance for future mine areas.

Dear Mr. Tetting:

As per our conversation of June 9, 1982, I have enclosed a map of Price River Coal Company's lands and all proposed facilities for you to forward to Jim Dykeman of the State History office. You've indicated that with such a map, State History may be able to provide some background information or make recommendations for future studies.

Please contact me if State History wishes to visit the area.

Sincerely,

PRICE RIVER COAL COMPANY

Robert L. Wiley  
Environmental Engineer
