Re: Coal Preparation Facility Sediment Ponds

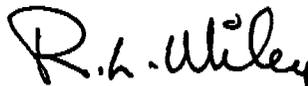

Dear Mr. McNeal:

Please review the attached revised pond designs. As recommended, we have flattened the interior slopes of the 012B embankment to 3:1. The materials to be used for the embankment will be derived from Pond 012A excavation. A test pit was dug to obtain samples which are currently being analyzed. Copies of the analyses will be provided. The compaction which will be obtained will be 95% of ASTM T-99.

Please do not hesitate to contact me if you need additional information.

Sincerely,

PRICE RIVER COAL COMPANY

R. L. Wiley
Environmental Engineer
