Memo to Coal File:

RE: Slide Report Compliance with  
UMC 817.99  
Price River Coal Co. Complex  
ACT/007/004  
Folder No. 13  
Carbon County, Utah

A report was received on April 14, 1983 from Rob Wiley of Price River Coal Company.

A slide occurred during the week at the #3 Mine. Dirt, 12-14' wide, 15-20' high, in loadout area removed a diversion ditch and moved 8-10' downward (25 yd<sup>3</sup> of material).

Undisturbed drainage would be able to come onto the site. Disturbed drainage would be contained on-site. Ponds may receive additional sedimentation for a period of 7 days while removal plans are formulated and executed. A follow up written report will arrive shortly.
