RE: Willow Creek Stream
Channel Culvert Approval
ACT/007/004, Folder #4
Carbon County, Utah

Dear Rob:

The Division has completed its review of the proposed stream channel culvert modification submitted by Price River Coal Company on July 12, 1983, and has determined that the 10-foot diameter smooth steel pipe is adequate to handle the probable flood event for the projected life of the access area. I apologize for not getting this reviewed sooner, but the staff had a difficult time finding a nomograph for smooth steel pipe and also locating your borrow site.

Approval of the modification is hereby granted and construction may commence according to the proposals set forth in the modification. If we may be of further assistance, please let us know.

Sincerely,

JAMES W. SMITH, JR.
