Memo to Coal File:

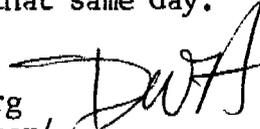

RE: Phone Conversation  
NOV N84-2-2-7, #2 of 7  
Price River Coal Company  
ACT/007/004, Folders #3 & #7  
Carbon County, Utah

On April 20, 1984, D. Wayne Hedberg received a call from Mr. Rob Wiley of Price River Coal Company. The discussion involved questions regarding our April 17th letter, which addressed remaining deficiencies with the company's recent abatement plans for N84-2-2-7.

Mr. Wiley stated he had re-evaluated his hydrologic design calculations and found his errors. He will transmit the corrected calculations for ditch sizing within a day or so. A three-week extension was requested by Mr. Wiley to provide the additional information requested in our letter. This information is not necessary to abate the violation and Mr. Wiley stated that he has already had some work done on enlarging the ditches in question to comply with our sizing recommendations (i.e., 10-year, 24-hour).

I verbally granted an extension until May 21, 1984 to provide this additional information. I also informed Mr. Wiley that I would speak with Sandy Pruitt (issuing inspector) and call him back if this presented a problem for her. Ms. Pruitt agreed with my recommendations later that same day.
