Re: Violation Abatement for NOV #84-2-2-5

Dear Mr. Hedburg:

Please find attached certified construction drawings for Price River Coal Company Ponds 011, 012A, and 012B. A similar drawing was provided to you for Pond 014 on 3-14-84.

Requirements of abatement also include certification of a non-sediment pond, an issue discussed on 3-14-84. Price River Coal Company has petitioned the Board of Oil, Gas, and Mining for relief from this requirement until a determination can be made as to its legality. Additionally and rather confusingly, a new requirement has been added to the abatement; designs for a process water pond that was first added as a concern and then deleted. We do not understand how plans can be required as abatement to a violation for something that is not part of the violation. We have also included this issue in our action before the Board.

PRCC is happy to provide you or anybody else with requested information concerning various non-sediment pond water containing structures.

The following is a list of capacities in gallons of various structures:

North Raw Water Pond.....	3,400,000
Thickener.....	1,300,000
North Process Water Basin.....	1,600,000
South Process Water Basin.....	600,000

We are not certain what additional information that you might like to have but if you wish to specify, we will gladly provide it.

Sincerely,

PRICE RIVER COAL COMPANY

Rob L. Wiley
Environmental Engineer
