RE: Letter dated November 20, 1986 on Approval for Upgrading of Surface
Facilities in Hardscrabble Canyon

Dear Mr. Hedberg:

Your approval letter for the upgrading of the surface facilities in Hardscrabble Canyon requested an additional 12 copies of the entire package which was approved by the division. Our approved design of the surface facilities contains a proposal for a package sewage treatment plant.

Since the initial design of the upgrading of the facilities was made, Helper City has obtained funds to extend their sewer line to the mining facilities in Hardscrabble Canyon. A final design of Helper's sewer line will not be available until January of 1987. At that time it will be necessary to revise the maps which were submitted in the package for the upgrading of the surface facilities. The revisions will show removal of the package sewage treatment plant, infiltration pond and the location of the new sewer line.

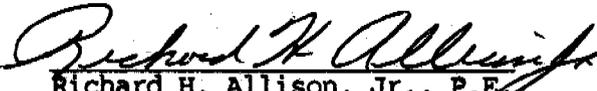

Because the division will begin the mid-term permit review process in January of 1987, I am requesting a delay until January for providing you with these additional 12 copies. All of the maps which you are requesting will need to be revised within the next two months in order to show the new sewer line project being built by Helper City.
