RE: Conditional Approval, MRP Amendment, Drainage Control
Modifications in Hardscrabble Canyon, Price River Complex,
ACT/007/004, # 3 & 4, Carbon County, Utah

On April 21, 1986, the Division sent a Conditional Approval to the Price River Coal Company for MRP Amendment to Modify Drainage Control in Hardscrabble Canyon. The condition required that Price River Coal (Castlegate Coal) submit plans for an energy dissipator at the outlet of diversion- 3A as it enters diversion D-5 at least 15 days prior to commencement of construction of the drainage control modifications. Castlegate Coal has already commenced construction of the drainage control modifications and as of July 27, 1986 the Division has not received the energy dissipator designs.

Reommendation: Castlegate Coal Company should be sent a letter requesting that the energy dissipator designs be submitted immediatly as construction has already commenced. Castlegate is not in compliance with the conditional approval until these designs have been submitted .
