Dear Mr. Allison:

Re: Final Approval, MRP Amendment, Drainage Control Modifications
in Hardscrabble Canyon, Castlegate Coal Company, Price River
Complex, ACT/007/004-I, Folder No. 3 and 4 Carbon County, Utah

On October 22, 1986, the Division received your response to our October 15, 1986 deficiency letter which requested additional information to demonstrate that Diversion D-6 is capable of passing the 10-year 24-hour precipitation event. On December 1, 1986, the Division received your conditional approval response to the MRP amendment referenced above. This letter will serve as the Division's final approval of your December 1, 1986 amendment response. In addition, your October 22, 1986 response for diversion D-6, now meets the requirements of UMC 817.44 and all of the remaining concerns as outlined in our August 21, 1986 deficiency letter. All conditions, as required by this office to complete this permitting action, have now been adequately addressed.

Thank you for your cooperation in completing this permitting activity. As always, please call should you have any questions or need additional information.

Sincerely,

D. Wayne Hedberg
Permit Supervisor/
Reclamation Hydrologist
