RE: Holding Tank
Castle Gate Coal Company
Helper, Utah

Dear Mr. Allison:

We have reviewed your request for amendment to the construction permit dated September 8, 1986. The amendment was requested in your letter of April 15, 1987 to accommodate planned increase in the daily work force using the temporary holding tank facilities in Hardscrabble Canyon. Based upon our review of operations and the ultimate wastewater disposal plan, the construction permit is hereby amended as follows:

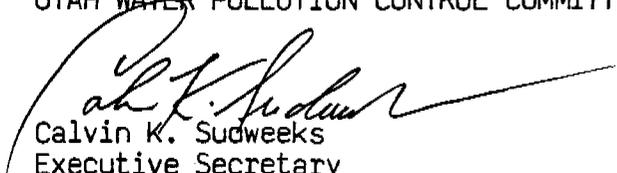

1. The period for operating the holding tank as a temporary means of wastewater treatment and disposal is extended through December 31, 1987.
2. A daily work force of 90, based upon a worker flow contribution of 35 gallons per day, is approved to be served by the holding tank.

Amendment of the construction permit is based upon a schedule which will insure completion of the outfall sewer by December 31, 1987. The anticipated completion date of plans and specifications is June 22 1987. The target date for beginning construction of the outfall sewer is August 10, 1987. Any deviation from the foregoing conditions must be approved by us in advance.

We appreciate your cooperation with our staff in completing this review. If we can be of further assistance, please contact Mr. David Ariotti of our staff.

Sincerely,

UTAH WATER POLLUTION CONTROL COMMITTEE

Calvin K. Sudweeks
Executive Secretary
