DIVISION OF
OIL, GAS & MINING

Attention: Mr. Lowell Braxton, Administrator

Dear Mr. Braxton:

I have looked through Castle Gate Coal Company's permit for wording which describes the small areas within the permit which do not report to a sediment pond. Scattered throughout the permit are descriptions of straw bale dikes, vegetation mulch etc. which will be used as alternative sediment controls in those areas. I did not find one location within the permit which listed all of these small areas.

In order to rectify the situation and clarify the exemptions, I added a new section (7.2-2(1)A) to the permit which lists the areas. This is a new Page 50 in Chapter VII. Enclosed are two copies of this revision which will replace the pages of the mid-term submittal which was given to the Division.

Sincerely,

Richard H. Allison, Jr., P.E.
Project Supervisor
