Helper, Utah 84526

Dear Mr. Allison:

Re: Approval of Notice of Violation Abatement Plan, #N88-18-1-1, #1 of 1,
Secondary Sediment Control/Retaining Wall for Counter Weight Structure,
Castle Gate Coal Company, Price River Complex, ACT/007/004-88B, Folder #3
and 5, Carbon County, Utah

The Division has completed the review of the Notice of Violation abatement plans for #N88-18-1-1, #1 of 1, received March 10, 1988. The plans have been reviewed by David Darby, Geologist for the Division. The operator's response to the Notice of Violation has been determined adequate for approval. The abatement actions to correct the sediment control concerns have been implemented at the minesite as of a March 22, 1988 field inspection by Daron Haddock, DOGM Inspector.

Castle Gate Coal Company has satisfactorily addressed the Division's requirements to abate this violation. Thank you for your cooperation in completing this permitting action.

Sincerely,

D. Wayne Hedberg
