April 6, 1988

Mr. Richard H. Allison, Jr.
Project Supervisor
Castle Gate Coal Company
P. O. Box 449
Helper, Utah 84526

Dear Mr. Allison:

Re: Review of Conditional Approval Response, As-Built Plans for Unit Train Loadout Facility, Castle Gate Coal Company, Price River Mine Complex, ACT/007/004-87C, Folder #2, Carbon County, Utah

The Division has completed the review of Castle Gate Coal Company's conditional approval response regarding as-built plans for the new Unit Train Loadout Facility. The plans have been reviewed by the Division's technical staff. The operator's response is not adequate for final approval. Please refer to the attached technical memoranda for a summary of the information which must be addressed before final approval of this permit change may be considered.

Please provide your response to the remaining technical concerns by May 10, 1988. Upon final approval, fourteen (14) complete sets of the approved plans will be required, which are formatted to allow direct insertion into the file copies of the operator's approved Mining and Reclamation Plan (MRP) for the Price River Mine Complex. Thank you for your cooperation in completing this permitting action.

Sincerely,

D. Wayne Hedberg
Data Management Coordinator
