RE: Request Use of Video Camera to Establish the Present Affected Area at Castle Gate Mine, Amax Coal Industries, Castle Gate Mine, ACT/007/004, Folder #2, Carbon County, Utah

In light of the upcoming board hearing involving establishment of AMAX Coal Industries affected area and A.O.C. requirements, the visual effects of a video camera would be useful in presenting the existing site conditions at Castle Gate Mine to the board.

This use is not for inspection purposes, but will be a part of a two day photo documentation period. The documentation period is scheduled to take place on October 29th and 30th, 1991. It is felt that the photo documentation will be greatly enhanced with video documentation.

Please inform us if you feel this action is justified. There is only a short time period remaining for us to arrange for the use of a video camera. It is my understanding that there are only a few interdepartmental cameras that may be used at the request of the director.

Thank you for your attention to this matter.
