Folder #2

DIVISION OF OIL GAS & MINING FIELD VISIT FORM TECHNICAL

Date : November 8, 1995

Time: 10:30 A.M. to 11:30 A.M.

Mine: Castle Gate Mine ACT/007/004

File Number: ACT/007/004-#2

DOG M Staff: Steven Johnson, Mike Suflika, and Sharon Falvey

Other

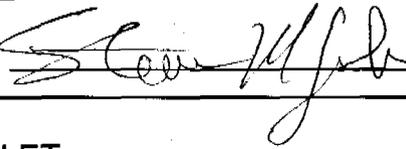

Attendees: None

Purpose: Observe reclamation of Sowbelly Canyon. Particularly the reclamation of SBRD-4, SBRD-1 and reseeding of many areas.

Observations: SBRD-4 and SBRD-1 have been riprap and the riprap has been covered with finer material. Visible riprap looks like the right size and gradation, but SBRD-4 will need to be tamped down. About 80 of the area has been seeded. There is some question about the rate of mulch laid down, but after further evaluation it appears to be the proper rate. A low spot near the confluence of SBRD-1 and SBRD-2 will need to be protected from runoff in upper slopes.

Recommendations/Conclusions:

Johnny Papas has been inform to correct the low spot by moving land to force most water to by-pass and flow directly into the main channel. Papas has also be informed to complete work on SBRD-2. The general regrading and reseeding work looks better than before.
