**DIVISION OF OIL GAS & MINING
 FIELD VISIT FORM
 TECHNICAL**

Date : August 20, 1996

Time: 12:15 p.m. to 12:45 p.m.

Mine: Castle Gate Mine (Hardscrabble Canyon)

File Number: ACT/007/004. Folder #2

DOG M Staff: Steven Johnson

Other Attendees: Bill Minchey (Minchey Digging)

Purpose:

Examine reclamation operations and discuss reclamation of the main channel.

Observations:

Reclamation activities were moving along. In attempts to save a large group of oaks, the contractor has devised a plan to reengineer the upper most section of the main channel to include a cut in the channel above the planned reclamation area. This will work to make a smoother transition between the two areas and will also increase the amount of clean fill available.

Recommendations/Conclusions:

The idea of redesigning the upper section of the main channel will be considered a field change. Reclamation activities are progressing well. Site visits are anticipated every other week during most of the reclamation process.
